

# WELCOME TO THE WORLD OF PERFECT PACKAGING

www.bub-group.com

## SIDE GUSSET BAG MACHINES

- Modular design
- Variety of features (handles, zipper, slider)
- Maximum automation & advanced process control
- Mono material optimized
- Intuitive HMI including recipe management
- Bag production from one roll possible

## WOVEN PP PINCH BAG MACHINES

- Lightweight and equally robust woven bags with pinch bottom or reclosure
- The bags are characterized by a large panel presentation area and good palletizability
- Up to 80 bags per minute

## ROBOTIC - LEAP

- LEAP is an innovative development to pack your bags and sacks produced on B&B bag making machines into pallet boxes
- Easy setup of packing patterns
- Up to 200 bags/min.

## PACKAGING IN FILM

- Up to 45 bundles/min
- Stretch technology (servo): tight bundles (without shrinking) - more products on pallet
- Less material consumption
- Superior palletizing characteristics
